

Personal Skill Development in Grades 6-12

Enhancing Learning for 21st Century Success

The workplace has evolved into a high-tech and high-performance environment in which employees are expected to be independent thinkers and problem solvers. To keep up with the changes in the nature of work, secondary schools must integrate personal skill development into the existing curriculum in all classrooms.

With a few adjustments, these behavioral, or “soft,” skills can be incorporated into teachers’ lesson plans and methods.

Personal Skill Development in Grades 6-12 — Enhancing Learning for 21st Century Success is a teacher training kit that identifies ways to integrate personal skills into the overall school curriculum. The activities, strategies, processes, and lessons described in this resource kit will help schools develop a “culture of success” for every student — not only in school, but also in the world outside the classroom.

Teachers meet the challenge of creating this culture of success by continually adjusting their instruction to meet student needs. To prepare students for the workplace, educators should focus on the whole student and design classroom and community activities that require students to interact with others. The activities and strategies included in this kit will help schools identify those “portable, generic” personal skills, habits, and character traits that educators, employers, and stakeholders have identified as critical to lifelong learning and success in adult roles.

Resource Kit

#K-07-PSD
\$295
